Imugene Limited Annual report: 2019

\$

Imugene Limited Appendix 4E Year ended 30 June 2019

Name of entity:	Imugene Limited
ABN:	99 009 179 551
Year ended:	30 June 2019
Previous period:	30 June 2018

Results for announcement to the market

Revenue from ordinary activities	-	-%	to	-
Loss from ordinary activities after tax attributable to members	Up	97.7%	to	(7,775,360)
Net loss for the period attributable to members	Up	97.7%	to	(7,775,360)

Distributions

No dividends have been paid or declared by the company for the current financial year. No dividends were paid for the previous financial year.

Explanation of results

Please refer to the review of operations and activities on pages 5 to 11 for explanation of the results.

Additional information supporting the Appendix 4E disclosure requirements can be found in the review of operations and activities, directors' report and the financial statements for the year ended 30 June 2019.

Net tangible assets per security

	2019 Cents	2018 Cents
Net tangible asset backing (per security)	0.56	0.29

Changes in controlled entities

There have been no changes in controlled entities during the year ended 30 June 2019.

Other information required by Listing Rule 4.3A

a. Details of individual and total dividends or distributions and dividend or distribution payments:	N/A
b. Details of any dividend or distribution reinvestment plans:	N/A
c. Details of associates and joint venture entities:	N/A
d. Other information	N/A

Audit

The financial statements have been audited by the group's independent auditor without any modified opinion, disclaimer or emphasis of matter.

Imugene Limited

Chairman's letter

Imugene Limited: Annual report

H IMUGENE

Chairman's letter

Dear fellow shareholders,

On behalf of the board, I present my review of your company's activities for the past financial year ended 30 June 2019.

Imugene continues to make solid progress across all fronts, and as I write we are poised to enter another exciting stage in the company's development.

Following completion of the Phase 1 clinical trial at the end of 2018, this calendar year we dosed the first patients in our HER-Vaxx Phase 2 clinical trial in gastric cancer which is recruiting patients across centres in Asia and Eastern Europe.

In 2018 we licensed B-cell peptide vaccine technology from Ohio State University with promising application in the field of immune checkpoint inhibitors, in particular PD-1, an area of intense interest in the life sciences industry. Management has been closely focused on pre-clinical development studies to ready the anti-PD-1 vaccine for entry into a Phase 1 clinical trial at the earliest opportunity.

The leadership team was enhanced during the year with the appointment of two outstanding, US based, non-executive directors, Dr Lesley Russell and Dr Jens Eckstein. Both have deep commercial and scientific experience and already have made a substantial contribution at board level and providing guidance to management.

Our CEO, Ms Leslie Chong has provided clear and decisive leadership during the year ably assisted by our small management team and has worked tirelessly to promote the company's interests. On behalf of the board I thank her for an outstanding effort.

The financial position of the company remains strong, and investor interest in our activities, both in Australia and overseas, is solid.

Since balance date, Imugene has announced it proposes to acquire an oncolytic virus being developed at the prestigious City of Hope Cancer Centre (COH) in Los Angeles. Details of this transaction is dealt with in the review of operations and activities.

The year has been an exciting one with contributions from across all fronts of the company. On behalf of the board I wish to express our thank to all stakeholders for their support and we look forward to an exciting year ahead.

Mr Paul Hopper

Executive Chairman

Review of operations and activities

Imugene Limited: Annual report

Review of operations and activities

30 June 2019

Imugene Limited is pleased to announce its financial results for the year ended 30 June 2019.

Financial review

The group reported a loss for the year ended 30 June 2019 of \$7,775,360 (2018: \$3,933,641). This increased loss compared to the comparative period is largely due to the significant increase in clinical trial and research activities undertaken by the group.

On the back of a successful \$20.1 million capital raise (before costs) in July 2018, the group's net assets increased to \$27,294,723 (2018: \$15,475,479). As at 30 June 2019, the group had cash reserves of \$19,047,914 (2018: \$7,822,057).

An overall increase in receivables for the year reflects the pending receipt of \$4,126,679 (2018: \$1,867,714) for the research and development tax rebate.

Operating review

HER-Vaxx

During the last financial year, management continued to monitor the enrolment and data collection for the HER-Vaxx Phase 1b/2 clinical trial. This included working with oncologists on the study to ensure that eligible patients are enrolled and guiding the contract research organisation (CRO) to attentively monitor the sites and data.

Phase 1b/2 gastric cancer study

Our current trial is targeting HER-2 positive gastric cancer. HER-2 positive gastric cancer was selected for this study as this type is not nearly as well served as breast cancer. Gastric cancer has slightly lower number of patients who are HER-2 positive. However, these patients have less access to the approved therapies and the disease is more severe than breast cancer offering a significant market opportunity for HER-Vaxx. Specific regions were chosen to conduct the study due to the

prevailing factors of higher rates of gastric cancer, access and reimbursement of standard of care.

The Phase 1b/2 gastric cancer study design is as follows:

- The Phase 1b trial is tested at three different doses of the HER-Vaxx vaccine with up to 18 patients (three groups of up to six patients) in combination with chemotherapy across clinical trial sites.
- The key endpoints are to identify the optimal dose of HER-Vaxx for the Phase 2 study, and to confirm safety. Researchers continue to monitor the patient's immune responses to the vaccine.
- The Phase 2 has commenced, 68 patients with metastatic gastric cancer overexpressing HER-2 will be randomised into two arms of either HER-Vaxx plus standard-of-care chemotherapy or standard-of-care chemotherapy only. The endpoints of this randomised trial will be overall survival, progression-free survival, immune response, and safety.

During the year, our established HER-Vaxx Phase 1b gastric cancer study was completed and met all study endpoints. Positive top-line results in patients expressing the HER-2 target protein were reported. In March 2019, the group dosed its first Phase 2 patient.

Additionally, Imugene presented the Phase 1b study results of its HER-Vaxx cancer vaccine at the American Association for Cancer Research (AACR) meeting in April 2019 in Atlanta, Georgia, and at the American Society of Clinical Oncology (ASCO) in Chicago, Illinois in June 2019.

Key results presented at the meetings included:

- 11 out of 14 evaluated patients showed clinically meaningful responses;
- Those patients that were dosed with 50 micrograms (the highest dose evaluated) showed marked increases of HER-2 specific antibody levels after vaccination;
- 2 of the 3 patients dosed with 50 micrograms demonstrated greater than 40% reduction in tumour size from baseline to day 56 (eight weeks);
- The vaccines were well tolerated and safe with antibody responses at the highest dose of 50 micrograms with no significant local or systemic reactions, and

• Trial showed clear dose-dependence of HER-2 specific antibody production.

The Phase 1b data continues to be submitted, published and presented at major cancer conferences globally. The Phase 2 HER-Vaxx study was initiated in March 2019 and is currently ongoing to further evaluate HER-Vaxx for the treatment of HER-2 positive gastric cancer.

Mimotope programme

A mimotope mirrors the structure of an epitope, the specific target an antibody binds to. Due to this property, it induces an antibody response like the one elicited by the monoclonal antibody. Professor Ursula Wiedermann with her team at the Medical University of Vienna are working on mimotope characterisation, immunogenicity and pre-clinical work to identify our next mimotope candidate. In early 2019, the team in Vienna successfully discovered new mimotope cancer vaccines that inhibited tumour growth in a syngeneic mouse model of HER-2 positive breast cancer via both passive and active immunisation strategies with PD-1 targeting B-cell cancer mimotope vaccines.

Ohio State University/Mayo Clinic licence

Imugene's PD1-Vaxx is a B-cell peptide cancer vaccine designed to treat tumours such as lung cancer by interfering with PD-1/PD-L1 binding and interaction, and produce an anti-cancer effect similar to Keytruda, Opdivo and the other immune checkpoint inhibitor monoclonal antibodies that are transforming the treatment of a range of cancers.

Dr Tanios Bekaii-Saab from the Mayo Clinic presented on the PD1-Vaxx (PD-1) and B-Vaxx (HER-2) cancer vaccines at the AACR 2019 in Atlanta, Georgia.

American Association for Cancer Research

PD1-Vaxx on its own and in combination with B-Vaxx, have shown potential in preclinical studies, showing

robust HER-2 (B-Vaxx) and PD-1 (PD1-Vaxx) antibody responses in all vaccinated mice. This study indicates that the combined vaccination is effective in reducing tumour growth versus either the PD-1 vaccine alone or more importantly the positive control gold standard that is anti-mouse PD-1 monoclonal antibody in a BALB/c syngeneic model of colon carcinoma. The vaccine combination was found to be safe and did not appear to exhibit toxicity or autoimmunity. Imugene is working to evaluate PD1-Vaxx and its potential efficacy in a range of cancers.

Imugene received and accepted the minutes of its Pre-Investigational New Drug (IND) meeting with the US Food and Drug Administration (FDA) for its PD1-Vaxx cancer immunotherapy on 8 February 2019.

The FDA meeting was productive and provided Imugene with a clear roadmap for a successful IND submission and subsequent clinical development of PD1-Vaxx.

Enhancement of Scientific Advisory Board

Imugene is guided by the experience of several recognised leaders in immunooncology who joined Imugene's Scientific Advisory Board (SAB). These pre-eminent cancer research leaders include: Dr Josep Tabernero, an internationally respected oncologist and President of ESMO; Professor Tanios Bekaii-Saab co-leader of the Gastrointestinal Cancer Program at the prestigious Mayo Clinic Cancer Center; Professor Pravin Kaumaya, the developer and lead inventor of Imugene's newly licensed peptide cancer vaccine programs from Ohio State University, and on 7 January 2019, Imugene announced the appointment of Professor Michael Caligiuri, President of the City of Hope National Medical Center in Los Angeles and most recent ex-president of AACR to its SAB.

Enhancement of management team

In August 2018, Imugene announced the appointment of Dr Mark T. Marino as Chief Medical Officer (CMO). Dr Marino is leading the group's global clinical development, regulatory and medical monitoring activities. Dr Marino brings deep experience to the group, having held senior level clinical development/leadership and CMO positions at top-tier pharmaceutical companies, including Daiichi-Sankyo, Hoffman-La Roche AG, and Novartis Pharmaceuticals Corporation.

Imugene's executive and management team (left to right): Mr Charles Walker (director), Prof. Pravin Kaumaya (SAB), Dr Anthony Good (VP Clinical Research), Ms Leslie Chong (CEO and MD), Dr Axel Hoos (Director), Dr Nicholas Ede (CTO), Mr Paul Hopper (Chairman) and Dr Mark Marino (CMO)

Enhancement of leadership team

In April 2019, Imugene announced the appointment of leading global pharmaceutical executive Dr Lesley Russell as a Non-Executive Director, effective 23 April 2019. Dr Russell has more than 25 years' international operational and leadership experience with a number of established and emerging pharmaceutical companies across multiple therapeutic areas including oncology and haematology.

In May 2019, Imugene announced the appointment of leading biotechnology executive and entrepreneur Dr Jens Eckstein as a Non-Executive Director, effective 20 May 2019. Dr Eckstein recently joined Apollo Ventures as Managing Partner. Before that, Dr Eckstein was President of SR One Limited, the corporate venture capital arm of GlaxoSmithKline which invests globally in emerging life science

Dr Lesley Russell

companies pursuing innovative science with significant impact on medical care and patients.

Events since the end of the financial year

In early July 2019, an oral presentation of the Phase 1b study results of Imugene's HER-Vaxx cancer vaccine was well received at the European Society of Medical

GOOD SCIENCE BETTER MEDICINE BEST PRACTICE Oncology (ESMO) World Congress in Gastrointestinal cancer in Barcelona, Spain.

The group announced on 15 July 2019 that it would acquire Vaxinia Pty

Ltd and separately acquire a worldwide exclusive licence to a promising oncolytic virus technology, known as CF33, developed at City of Hope, a world-renowned independent research and treatment centre for cancer based in Los Angeles, California. CF33 is a chimeric vaccinia poxvirus from the lab of Professor Yuman Fong, Chair of Surgery at City of Hope, and a noted expert in the oncolytic virus field. Completion of the acquisition is subject to a number of customary conditions precedent, and shareholder approval at an Extraordinary General Meeting to be convened shortly.

Prof. Yuman Fong (left), Ms Leslie Chong (centre) and Dr Jens Eckstein (right)

Business strategy and future prospects

The focus of the group's operations in the short to medium term will be directed at development of CF33 in a first in human study and continued enrolment of the HER-Vaxx Phase 2 study.

An equal priority is to establish the FDA IND package for PD1-Vaxx for submission and approval to commence the Phase 1 study in the first in human study with the first anti PD-1 peptide cancer vaccine (PD1-Vaxx).

For and on behalf of the company

14

Ms Leslie Chong

Chief Executive Officer and Managing Director

Directors' report

Imugene Limited: Annual report

Your directors present their report on the consolidated entity consisting of Imugene Limited and the entities it controlled at the end of, or during, the year ended 30 June 2019. Throughout the report, the consolidated entity is referred to as the group.

Directors and company secretary

The following persons held office as directors of Imugene Limited during the whole of the financial year and up to the date of this report, except where otherwise stated:

Mr Paul Hopper, Executive Chairman Ms Leslie Chong, Chief Executive Officer and Managing Director Mr Charles Walker, Non-Executive Director Dr Axel Hoos, Non-Executive Director Dr Lesley Russell, Non-Executive Director (appointed 23 April 2019) Dr Jens Eckstein, Non-Executive Director (appointed 20 May 2019)

The following persons held office as company secretary of Imugene Limited during the whole of the financial year and up to the date of this report, except where otherwise stated:

Mr Phillip Hains Mr Justyn Stedwell

Principal activities

The group is an Australian immuno-oncology company developing a range of new and novel immunotherapies that seek to activate the immune system of cancer patients to treat and eradicate tumours.

Lead products under development by the group are HER-Vaxx, PD1-Vaxx (formerly KEY-Vaxx) and B-Vaxx. HER-Vaxx is a proprietary HER2-positive cancer vaccine that stimulates a polyclonal antibody response against the HER2/neu receptors which are prevalent in breast cancer and gastric cancer. PD1-Vaxx a cancer vaccine which aims to induce the body to produce polyclonal antibodies that block PD-1 signalling, and thus produce an anticancer effect similar to Keytruda, Opdivo and the other immune checkpoint inhibiting monoclonal antibodies that are transforming treatment for a range of cancer indications. B-Vaxx is a further cancer vaccine designed to treat tumours that over-express the HER2/neu receptor.

The group is maintaining and strengthening its already strong international intellectual property position as a key area of focus in maintaining the competitive advantage of HER-Vaxx, PD1-Vaxx, B-Vaxx and any future improvements, vaccine formulations and clinical uses.

Dividends - Imugene Limited

No dividends were declared or paid to members for the year ended 30 June 2019. The directors do not recommend that a dividend be paid in respect of the financial year.

Review of operations

Information on the operations and financial position of the group and its business strategies and prospects is set out in the review of operations and activities on pages 5 to 11 of this annual report.

Significant changes in the state of affairs

Significant changes in the state of affairs of the group during the financial year were as follows.

Share capital increased by \$18,836,562 (from \$44,285,931 to \$63,122,493) as the result of a rights issue and placement in July 2018 and the issue of shares on the exercise of options. Details of the changes in contributed equity are disclosed in note 6(a) to the financial statements.

Events since the end of the financial year

On 15 July 2019, the group announced that it would acquire Vaxinia Pty Ltd and separately acquire a worldwide exclusive licence to an oncolytic virus technology. Known as CF33, this technology was developed by Professor Yuman Fong at City of Hope, an independent research and treatment centre for cancer, diabetes and other life-threatening diseases based in Los Angeles, California.

Under the terms of the licence agreement, the group acquires the exclusive worldwide rights to develop and commercialise the CF33 oncolytic virus. The group has agreed to pay City of Hope licence fees comprising upfront and annual maintenance fees which are creditable against future royalty payments, performance-based consideration linked to the achievement of certain value-inflection development milestones and commercial outcomes, as well as net sales-based royalty payments and sublicensing fees.

As part of the overall transaction, the group has entered into a binding agreement to acquire 100% of the share capital in Vaxinia Pty Ltd, whose major shareholder is Paul Hopper, Executive Chairman of the group. Completion of the acquisition is subject to a number of customary conditions precedent and shareholder approval. The transaction, includes an up-front cash payment and the issue of ordinary fully paid Imugene Limited ordinary shares valued at \$1.619 million based on the seven-day VWAP prior to 15 July 2019.

The shareholders of Vaxinia Pty Ltd will also be eligible for further payments in equity on the achievement of performance-related milestones as disclosed in the 15 July 2019 announcement.

No other matter or circumstance has arisen since 30 June 2019 that has significantly affected the group's operations, results or state of affairs, or may do so in future years.

Likely developments and expected results of operations

The group aims to create value for shareholders through researching, developing and commercialising oncolytic immunotherapies that seek to activate the immune system of cancer patients to treat and eradicate tumours. These development programs are not expected to generate revenues in the short-term; long-term, and pending a successful development outcome, these development programs could increase shareholder value by many multiples.

More information on these developments is included in the review of operations and activities on pages 5 to 11 of this annual report.

Environmental regulation

The group is not affected by any significant environmental regulation in respect of its operations.

Information on directors

The following information is current as at the date of this report.

Mr Paul Hopper Executive Chairman				
Experience and expertise	Mr Hopper has over 20 years' experience in the management and funding of biotechnology and healthcare public companies both as chief executive officer and director in Australia and the United States. Mr Hopper's sector experience has covered a number of therapeutic areas with a particular emphasis on immunotherapy and cancer vaccines. He also has extensive capital markets experience in equity and debt raisings in Australia, Asia, Europe, and the United States.			
Date of appointment	31 October 2012			
Other current directorships (listed)	Prescient Therapeutics Limited (ASX: PTX), since 30 May 2014 SUDA Pharmaceuticals Ltd (ASX: SUD), since 15 May 2019			
Former directorships in last 3 years (listed)	Viralytics Limited (ASX: VLA), until 21 June 2018			
Special responsibilities	None			
Ms Leslie Chong Chief E	xecutive Officer and Managing Director			
Experience and expertise	Ms Chong joined the group in September 2015 from the leading oncology clinical development company, Genentech (a member of the Roche family), where she was a Senior Clinical Program Lead at the head office in San Francisco. She has over 21 years experience in leading clinical and department development in oncology. In November 2016, Ms Chong was promoted as Imugene's CEO and joined the board as Managing Director in March 2018.			
Date of appointment	28 March 2018			
Other current directorships (listed)	None			
Former directorships in last 3 years (listed)	None			

Information on directors (continued)

Mr Charles Walker Non-E	Ir Charles Walker Non-Executive Director			
Experience and expertise	Mr Walker has broad and successful experience across the biotechnology and life sciences industry. His experience includes significant operational and leadership positions in biotechnology firms, a strong capital markets track record from executing nearly 60 international and domestic corporate transactions, both as principal and advisor, and a detailed scientific understanding gained from a technical background in pharmacology. Mr Walker was previously Chief Executive Officer and Chief Financial Officer of Alchemia Limited (ASX: ACL) and Managing Director of Imugene. His qualifications include a Bachelor of Science (Honours) Pharmacology and a Masters in Business Administration (MBA).			
Date of appointment	13 September 2015			
Other current directorships (listed)	None			
Former directorships in last 3 years (listed)	None			
Special responsibilities	Chair of the audit and risk committee Member of the remuneration and nomination committee			

Dr Axel Hoos Non-Execu	Dr Axel Hoos Non-Executive Director			
Experience and expertise	Dr Axel Hoos is Senior Vice President and Therapeutic Area (TA) Head, Oncology R&D at GlaxoSmithKline Pharmaceuticals (GSK). As leader of the Oncology TA, he oversees strategy and execution for its discovery, development and business functions and builds the oncology portfolio across several modalities including antibodies, small molecules, bispecific molecules and cell and gene therapies. The TA's scientific focus is on immuno-oncology, epigenetics and cell therapy. Dr Hoos also serves on the Scientific Advisory Board of the HIV Cure Center, a co-venture of GSK and the University of North Carolina at Chapel Hill, and as the Executive Chairman of the Sabin Vaccine Institute Previously, Dr Hoos was the global medical lead in immunology/oncology at Bristol-Myers Squibb (BMS) where he developed Yervoy (Ipilimumab), the first life-extending therapy in immuno-oncology. Before BMS, Dr Hoos was Senior Director of Clinical Development at Agenus Bio (previously Antigenics).			
Date of appointment	20 December 2013			
Other current directorships (listed)	None			
Former directorships in last 3 years (listed)	None			
Special responsibilities	Member of the audit and risk committee Chair of the remuneration and nomination committee			

Information on directors (continued)

Dr Lesley Russell Non-Executive Director			
Experience and expertise Dr Lesley Russell is a haematologist/oncologist and has over 25 years' experience and expertise Dr Lesley Russell is a haematologist/oncologist and has over 25 years' experience as a chief medical officer. undertaken clinical development in a number of therapeutic areas including haematology/oncology has had multiple new drug approvals with both Food a Administration (FDA) and European Medicines Agency (EMA). Dr Russell ha experience as a director of NASDAQ listed pharmaceutical companies. She is of the Royal College of Physicians UK.			
Date of appointment	23 April 2019		
Other current directorships (listed)	Enanta Pharmaceuticals (NASDAQ: ENTA), since 22 November 2016		
Former directorships in last 3 years (listed)	AMAG Pharma (NASDAQ: AMAG), until May 2019 Endocyte Pharmaceuticals (NASDAQ: ECYT), until December 2018		
Special responsibilities Member of the remuneration and nomination committee			

Dr Jens Eckstein Non-Executive Director

Experience and expertise	Dr Eckstein has more than 15 years' venture capital experience in the biopharmaceutical industry and 10 years' operational experience in drug discovery and development. He is a Kauffman Fellow and a mentor for lifescience entrepreneurs and start-up teams in the area of innovative lifescience and healthcare information technology companies. Before joining Apollo Ventures, Dr Eckstein served as president of SR One for eight years. He is also co-founder and managing director of Action Potential Venture Capital (APVC). Previously, he was a general partner at TVM Capital.			
Date of appointment	20 May 2019			
Other current directorships (listed)	None			
Former directorships in last 3 years (listed)	None			
Special responsibilities	Member of the audit and risk committee			

Company secretary

The joint company secretaries are Mr Phillip Hains and Mr Justyn Stedwell.

Mr Phillip Hains was appointed to the position on 20 December 2012. Mr Hains is a Chartered Accountant operating a specialist public practice, 'The CFO Solution'. The CFO Solution focuses on providing back office support, financial reporting and compliance systems for listed public companies. A specialist in the public company environment, Mr Hains has served the needs of a number of company boards and their related committees. He has over 30 years' experience in providing businesses with accounting, administration, compliance and general management services. He holds a Master of Business Administration from RMIT University and a Public Practice Certificate from the Chartered Accountants Australia and New Zealand.

Mr Justyn Stedwell was appointed to the position on 30 July 2012. He is a professional company secretary with over 10 years' experience as a company secretary in ASX listed companies. Mr Stedwell has completed a Bachelor of Business and Commerce (Management and Economics) at Monash University, a Graduate Diploma of Accounting at Deakin University, a Graduate Diploma in Applied Corporate Governance with Chartered Secretaries Australia and Graduate Certificate of Applied Finance with Kaplan Professional.

Meetings of directors

The numbers of meetings of the company's board of directors and of each board committee held during the year ended 30 June 2019, and the numbers of meetings attended by each director were:

	Full meetings		Meetings of committees				
	of dir	of directors		Audit		Remuneration	
	A	В	Α	В	Α	В	
Mr Paul Hopper	6	7	5	6	1	1	
Ms Leslie Chong	6	7	-	-	-	-	
Mr Charles Walker	7	7	6	6	1	1	
Dr Axel Hoos	7	7	6	6	1	1	
Dr Lesley Russell	1	1	-	-	-	-	
Dr Jens Eckstein	1	1	-	-	-	-	

A = Number of meetings attended

B = Number of meetings held during the time the director held office or was a member of the committee during the year

Given recent board appointments and Mr Paul Hopper's existing duties as Executive Chairman, Mr Hopper voluntarily stepped down as member of the audit and risk committee and remuneration and nomination committee in June 2019. He was superseded by Dr Jens Eckstein and Dr Lesley Russell, respectively (both Non-Executive Directors).

Remuneration report (audited)

The directors present the Imugene Limited 2019 remuneration report, outlining key aspects of our remuneration policy and framework, and remuneration awarded this year.

The report is structured as follows:

- (a) Key management personnel (KMP) covered in this report
- (b) Remuneration policy and link to performance
- (c) Elements of remuneration
- (d) Link between remuneration and performance
- (e) Remuneration expenses
- (f) Contractual arrangements with executive KMPs
- (g) Non-executive director arrangements
- (h) Additional statutory information

(a) Key management personnel covered in this report

Non-executive and executive directors (see pages 15 to 17 for details about each director)

Mr Paul Hopper, Executive Chairman Ms Leslie Chong, Chief Executive Officer and Managing Director Mr Charles Walker, Non-Executive Director Dr Axel Hoos, Non-Executive Director Dr Lesley Russell, Non-Executive Director (appointed 23 April 2019) Dr Jens Eckstein, Non-Executive Director (appointed 20 May 2019)

Other key management personnel

Dr Nicholas Ede, Chief Technology Officer Dr Mark Marino, Chief Medical Officer (appointed 23 August 2018)

(b) Remuneration policy and link to performance

Our remuneration and nomination committee is made up of independent non-executive directors. The committee reviews and determines our remuneration policy and structure annually to ensure it remains aligned to business needs, and meets our remuneration principles. In particular, the board aims to ensure that remuneration practices are:

- · competitive and reasonable, enabling the company to attract and retain key talent
- · aligned to the company's strategic and business objectives and the creation of shareholder value
- transparent and easily understood, and
- acceptable to shareholders.

Remuneration report (audited) (continued)

(b) Remuneration policy and link to performance (continued)

Element	Purpose	Performance metrics	Potential value
Fixed remuneration (FR)	Provide competitive market salary including superannuation and non-monetary benefits	Nil	Positioned at the market rate
STI	Reward for in-year performance and retention	Company and individual performance goals	CEO: 33.3% of FR CTO: 30% of FR CMO: US\$60,000
LTI	Alignment to long-term shareholder value	Share price, capital raised, company and individual performance goals	CEO & CTO: 50,000,000 and 15,000,000, respectively, unlisted 3-year options at \$0.04, \$0.042 and \$0.045 exercise price CMO: 10,000,000 unlisted 2-year options at \$0.04 and
			\$0.042 exercise price

Assessing performance

The remuneration and nomination committee is responsible for assessing performance against KPIs and determining the STI and LTI to be paid. To assist in this assessment, the committee receives data from independently run surveys.

Performance is monitored on an informal basis throughout the year and a formal evaluation is performed annually.

Securities trading policy

Imugene Limited's securities trading policy applies to all directors and executives, see www.imugene.com/share-trading-policies/. It only permits the purchase or sale of company securities during certain periods.

(c) Elements of remuneration

(i) Fixed annual remuneration (FR)

Key management personnel may receive their fixed remuneration as cash, or cash with non-monetary benefits such as health insurance and car allowances. FR is reviewed annually, or on promotion. It is benchmarked against market data for comparable roles in companies in a similar industry and with similar market capitalisation. The committee aims to position executives at or near the median, with flexibility to take into account capability, experience, value to the organisation and performance of the individual.

(ii) Short-term incentives

All executives are entitled to participate in a short-term incentive scheme which provides for executive employees to receive a combination of short-term incentive (STI) as part of their total remuneration if they achieve certain performance indicators as set by the board. The STI can be paid either by cash, or a combination of cash and the issue of equity in the company, at the determination of the remuneration and nomination committee and board.

The company's CEO and CTO are entitled to short-term incentives in the form of cash bonus up to 33.3% and 30% of FR, respectively, against agreed key performance indicators (KPIs). On an annual basis, KPIs are reviewed and agreed in advance of each financial year and include financial (for CEO) and non-financial company (for CEO and CTO) and individual performance goals.

Remuneration report (audited) (continued)

(c) Elements of remuneration (continued)

(ii) Short-term incentives (continued)

The company's CMO is entitled to short-term incentives in the form of cash bonus up to US\$60,000 against agreed key performance indicators (KPIs). On an annual basis, KPIs are reviewed and agreed in advance of each financial year and include non-financial company and individual performance goals.

(iii) Long-term incentives

Executives may also be provided with longer-term incentives through the company's 'employee share option plan' (ESOP), that was approved by shareholders at the annual general meeting held on 2 November 2016. The aim of the ESOP is to allow executives to participate in, and benefit from, the growth of the company as a result of their efforts and to assist in motivating and retaining those key employees over the long-term. Continued service is the condition attached to the vesting of the options. The board at its discretion determines the total number of options granted to each executive.

(d) Link between remuneration and performance

Statutory performance indicators

We aim to align our executive remuneration to our strategic and business objectives and the creation of shareholder wealth. The table below shows measures of the group's financial performance over the last five years as required by the *Corporations Act 2001*. However, these are not necessarily consistent with the measures used in determining the variable amounts of remuneration to be awarded to KMPs. As a consequence, there may not always be a direct correlation between the statutory key performance measures and the variable remuneration awarded.

	2019	2018	2017	2016	2015
Loss for the year attributable to owners (\$)	7,775,360	3,933,641	2,506,571	2,730,642	2,440,789
Basic loss per share (cents)	0.22	0.15	0.12	0.19	0.21
Share price at year end (\$)	0.016	0.030	0.014	0.008	0.011

The company's earnings have remained negative since inception due to the nature of the business. Shareholder wealth reflects this speculative and volatile market sector. No dividends have ever been declared by Imugene Limited. The company continues to focus on the research and development of its intellectual property portfolio with the objective of achieving key development and commercial milestones in order to add further shareholder value.

(e) Remuneration expenses

The following tables show details of the remuneration expense recognised for the group's key management personnel for the current and previous financial year measured in accordance with the requirements of the accounting standards.

Remuneration report (audited) (continued)

(e) Remuneration expenses (continued)

The following table shows details of remuneration expenses of each director or other key management personnel recognised for the year ended 30 June 2019.

2019	Short-term benefits		Post- employment benefits	Long- term benefits	Share- based payments		
	Cash	Cash	Annual	Super	Long		
	salary and fees	Cash bonus	Annual leave	Super- annuation	service leave	Options	Total

Dr Mark Marino	236,120	42,715	-	-	-	43,685	322,520
Total KMP compensation	1,091,541	449,650	5,667	50,706	13,918	725,942	2,337,424

Notes

- Cash bonus includes the amount paid or accrued in the year ended 30 June 2019 in relation to FY 2018 and FY 2019 performance (i.e. 2 years' bonus recognised) as follows:
 - Mr Paul Hopper received discretionary bonuses of \$25,000 for FY 2018 (paid, approved by the board in FY 2019) and \$85,000 for FY 2019 (accrued, approved by the board in FY 2020), both recognising past performance.
 - Ms Leslie Chong was eligible for 85% of her 33.3% performance bonus for FY 2018 (\$85,000 paid, approved by the board in FY 2019) and 65% for FY 2019 (\$75,757 accrued, approved by the board in FY 2020). The bonuses were for meeting performance milestones (increase in share price, raising capital, management and staff resourcing, complete and/or manage all activities for site activation, HER-Vaxx and PD1-Vaxx clinical trials). In addition, it was determined by the board that Ms Chong would receive a further discretionary FY 2019 bonus of \$40,898.
 - Dr Nicholas Ede was eligible for 50% of his 30% performance bonus for FY 2018 (\$27,750 paid, plus superannuation up to the statutory limit, approved by the board in FY 2019) and 56% for FY 2019 (\$35,280 accrued, plus superannuation up to the statutory limit, approved by the board in FY 2020). The bonuses were for meeting performance milestones (KPI in relation to pre-clinical and clinical trials, file technology patents and/or IP, source and convert new immuno-oncology opportunities). In addition, it was determined by the board that Dr Ede would receive a further discretionary FY 2018 bonus of \$32,250 (plus superannuation up to the statutory limit, approved by the board in FY 2019).
 - Dr Mark Marino was eligible for 50% of his US\$60,000 performance bonus for FY 2019 (US\$30,000 or A\$42,715 accrued, approved by the board in FY 2020). The bonus was for meeting performance milestones (KPI in relation to clinical trials, pre-IND (investigational new drug) FDA meeting, medical monitoring and clinical development).

Remuneration report (audited) (continued)

(e) Remuneration expenses (continued)

The following table shows details of remuneration expenses of each director or other key management personnel recognised for the year ended 30 June 2018.

2018	Shor Cash salary	t-term bene Cash	fits Annual	Post- employment benefits Super-	Long- term benefits Long service	Share- based payments

Total KMP compensation	721,617	67,000	34,516	41,528	15,081	19,847	899,589

Notes

• Cash bonus includes the amount paid in the year ended 30 June 2018 in relation to FY 2017 performance as follows:

- Ms Leslie Chong was eligible for 50% of her 33.3% performance bonus. This amounted to \$50,000 (plus superannuation up to the statutory limit) and comprised the FY 2017 bonus for meeting performance milestones (increase in share price, raising capital, complete and/or manage all activities for site activation, KPI in relation to clinical trials), approved by the board in FY 2018.
- Dr Nicholas Ede was eligible for 28% of his 33% performance bonus. This amounted to \$17,000 (plus superannuation up to the statutory limit) and comprised the FY 2017 bonus for meeting performance milestones (KPI in relation to pre-clinical and clinical trials, file technology patents and/or IP, source and convert new immuno-oncology opportunities), approved by the board in FY 2018.
- Movement in annual leave obligations was not included in the annual report for the year ended 30 June 2018. This has been retrospectively included for consistency with the 30 June 2019 remuneration expenses.

(f) Contractual arrangements with executive KMPs

Name:	Mr Paul Hopper
Position:	Executive Chairman
Contract duration:	Unspecified
Notice period:	4 months by either party
Fixed remuneration:	\$137,400 per annum
Name:	Ms Leslie Chong
Position:	Chief Executive Officer and Managing Director
Contract duration:	Unspecified
Notice period:	12 months by either party
Fixed remuneration:	\$350,000 per annum, plus statutory superannuation

Remuneration report (audited) (continued)

(f) Contractual arrangements with executive KMPs (continued)

Name:	Dr Nicholas Ede
Position:	Chief Technology Officer
Contract duration:	Unspecified
Notice period:	3 months by either party
Fixed remuneration:	\$210,000 per annum, plus statutory superannuation
Name:	Dr Mark Marino
Position:	Chief Medical Officer
Contract duration:	Unspecified
Notice period:	30 days by either party
Fixed remuneration:	US\$200,000 per annum

(g) Non-executive director arrangements

Non-executive directors receive a board fee of US\$50,000 per annum, inclusive of chairing or participating on board committees. They do not receive performance-based pay or retirement allowances. The fees are inclusive of superannuation.

Fees are reviewed annually by the board taking into account comparable roles and market data provided by the board's independent remuneration adviser. The current base fees were reviewed with effect from 1 July 2018.

The maximum annual aggregate directors' fee pool limit is \$400,000 and was approved by shareholders at the annual general meeting on 15 October 2015.

No option holder has any right under the options to participate in any other share issue of the company or any other entity.

Shares under option (continued)

(b) Shares issued on the exercise of options

The following ordinary shares of Imugene Limited were issued during the year ended 30 June 2019 on the exercise of options. No further shares have been issued since that date. No amounts are unpaid on any of the shares.

Date options granted	lssue price of shares (\$)	Number of shares issued
2015-10-26 (IMUOP4)	0.015	10,000,000
2017-12-06 (IMUOA)	0.026	2,675
2018-07-13 (IMUOB)	0.040	2,070
		10,004,745

Insurance of officers and indemnities

(a) Insurance of officers

During the financial year, Imugene Limited paid a premium of \$87,881 to insure the directors and secretaries of the company and its Australian-based controlled entities.

The liabilities insured are legal costs that may be incurred in defending civil or criminal proceedings that may be brought against the officers in their capacity as officers of entities in the group, and any other payments arising from liabilities incurred by the officers in connection with such proceedings. This does not include such liabilities that arise from conduct involving a wilful breach of duty by the officers or the improper use by the officers of their position or of information to gain advantage for themselves or someone else or to cause detriment to the company. It is not possible to apportion the premium between amounts relating to the insurance against legal costs and those relating to other liabilities.

(b) Indemnity of auditors

Imugene Limited has agreed to indemnify their auditors, Grant Thornton Audit Pty Ltd, to the extent permitted by law, against any claim by a third party arising from Imugene Limited's breach of their agreement. The indemnity stipulates that Imugene Limited will meet the full amount of any such liabilities including a reasonable amount of legal costs.

Proceedings on behalf of the company

No person has applied to the Court under section 237 of the *Corporations Act 2001* for leave to bring proceedings on behalf of the company, or to intervene in any proceedings to which the company is a party, for the purpose of taking responsibility on behalf of the company for all or part of those proceedings.

No proceedings have been brought or intervened in on behalf of the company with leave of the Court under section 237 of the *Corporations Act 2001*.

Non-audit services

During the year ended 30 June 2019, the group did not engage the external auditor to provide non-audit services.

Auditor's independence declaration

A copy of the auditor's independence declaration as required under section 307C of the *Corporations Act 2001* is set out on page 30.

Rounding of amounts

The company is of a kind referred to in ASIC Legislative Instrument 2016/191, relating to the 'rounding off' of amounts in the directors' report. Amounts in the directors' report have been rounded off in accordance with the instrument to the nearest dollar.

This report is made in accordance with a resolution of directors.

a IA.

Mr Paul Hopper Executive Chairman

Sydney 30 August 2019

{The Auditor's Independence Declaration will be provided by your Auditor.}

Corporate governance statement

Imugene Limited: Annual report

Imugene Limited Corporate governance statement 30 June 2019 (continued)

Imugene Limited and the board are committed to achieving and demonstrating the highest standards of corporate governance. Imugene Limited has reviewed its corporate governance practices against the Corporate Governance Principles and Recommendations (3rd edition) published by the ASX Corporate Governance Council.

The 2019 corporate governance statement is dated as at 30 June 2019 and reflects the corporate governance practices in place throughout the 2019 financial year. The 2019 corporate governance statement was approved by the board on 30 August 2019. A description of the group's current corporate governance practices is set out in the group's corporate governance statement which can be viewed at www.imugene.com/corporate-governance.

1 Segment information

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Chief Executive Officer of Imugene Limited. The group has identified one reportable segment; that is, the research, development and commercialisation of oncolytic immunotherapies. The segment details are therefore fully reflected in the body of the financial statements.

2 Other income and expense items

(a) Other income

	2019 \$	2018 \$
Research and development tax incentive	4,127,281	1,840,786

(i) Fair value of R&D tax incentive

The group's research and development (R&D) activities are eligible under an Australian government tax incentive for eligible expenditure. Management has assessed these activities and expenditure to determine which are likely to be eligible under the incentive scheme. Amounts are recognised when it has been established that the conditions of the tax incentive have been met and that the expected amount can be reliably measured. For the year ended 30 June 2019, the group has included an item in other income of \$4,127,281 (2018: \$1,840,786) to recognise income over the period necessary to match the grant on a systematic basis with the costs that they are intended to compensate.

(b) Other gains/(losses)

Unused tax losses for which no deferred tax asset has been recognised	18,784,791	16,844,835
Potential tax benefit @ 27.5%	5,165,818	4,632,330

The numerical reconciliation of income tax expense to prima facie tax payable and unused tax losses for the year ended 30 June 2018 have been restated to reflect the income tax return lodged for the same period.

4 Financial assets and financial liabilities

(a) Cash and cash equivalents

	2019 \$	2018 \$
Current assets	1,852,560	1,798,530
Cash at bank and in hand	17,195,354	6,023,527
Deposits at call	19,047,914	7,822,057

(i) Reconciliation to cash flow statement

The above figures reconcile to the amount of cash shown in the consolidated statement of cash flows at the end of the financial year as follows:

	2019 \$	2018 \$
Balances as above	<u>19,047,914</u>	7,822,057
Balances per statement of cash flows	19,047,914	7,822,057

(ii) Classification as cash equivalents

Term deposits are presented as cash equivalents if they have a maturity of three months or less from the date of acquisition and are repayable with 24 hours notice with no loss of interest. See note 20(i) for the group's other accounting policies on cash and cash equivalents.

(iii) Risk exposure

The group's exposure to interest rate risk is discussed in note 9. The maximum exposure to credit risk at the end of the reporting period is the carrying amount of each class of cash and cash equivalents mentioned above.

(b) Trade and other receivables

			2019 Non-			2018 Non-	
		Current	current	Total	Current	current	Total
	Notes	\$	\$	\$	\$	\$	\$
Accrued receivables	4(b)(i)	4,167,056	-	4,167,056	1,914,264	-	1,914,264
Other receivables		48,114	-	48,114	443	-	443
		4,215,170	-	4,215,170	1,914,707	-	1,914,707

(i) Accrued receivables

Accrued receivables comprise \$4,126,679 from the Australian Taxation Office in relation to the R&D tax incentive (2018: \$1,867,714) and \$40,377 interest income from deposits at call (2018: \$46,550).

4 Financial assets and financial liabilities (continued)

(b) Trade and other receivables (continued)

(ii) Fair value of trade and other receivables

Due to the short-term nature of the current receivables, their carrying amount is considered to be the same as their fair value.

(c) Trade and other payables

		2019 Non-			2018 Non-	
	Current	current	Total	Current	current	Total
	\$	\$	\$	\$	\$	\$
Trade payables	1,479,429	-	1,479,429	288,507	-	288,507
Accrued expenses	727,029	-	727,029	53,985	-	53,985
Other payables	26,754	-	26,754	42	-	42
	2,233,212	-	2,233,212	342,534	-	342,534

Trade payables are unsecured and are usually paid within 30 days of recognition.

The carrying amounts of trade and other payables are considered to be the same as their fair values, due to their short-term nature.

(d) Other financial liabilities

	2019 \$	2018 \$
Non-current Expected future royalties payable (HER-Vaxx)	985,450	985,450

(i) Fair value of expected future royalties payable

The expected future royalties payable represents the fair value estimate of royalties payable to Biolife Science Forschungs-und Entwicklungsges mbH (BSFE) on commercial income arising from HER-Vaxx. This is based on 18 percent of fair value of the intellectual property at the time of acquisition of \$5.5 million. There has been no change in the future royalties as the carrying value is based on the initial consideration, and no reliable information has come to light that would change the valuation assumptions.

4 Financial assets and financial liabilities (continued)

(e) Recognised fair value measurements

(i) Fair value hierarchy

The following table provides the fair values of the group's financial instruments measured and recognised on a recurring basis after initial recognition and their categorisation within the fair value hierarchy. To provide an indication about the reliability of the inputs used in determining fair value, the group has classified its financial instruments into the three levels prescribed under the accounting standards. An explanation of each level follows underneath the table.

<i>Recurring fair value measurements</i> At 30 June 2019	Notes	Level 1 \$	Level 2 \$	Level 3 \$	Total \$
Financial liabilities Expected future royalties payable (HER-Vaxx)	4(d)		_	985.450	985.450
Total financial liabilities	+(u)			985,450	985,450
<i>Recurring fair value measurements</i> At 30 June 2018	Notes	Level 1 \$	Level 2 \$	Level 3 \$	Total \$
Financial liabilities Expected future royalties payable (HER-Vaxx)	4(d)	-	_	985,450	985,450
Total financial liabilities	.()	-	-	985,450	985,450

There were no transfers between levels of the hierarchy for recurring fair value measurements during the year ended 30 June 2019.

Level 1: The fair value of financial instruments traded in active markets (such as publicly traded derivatives and equity securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in level 1.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities.

5 Non-financial assets and liabilities

(a) Property, plant and equipment

Net book amount	71,025	7,988	35,140	118,942	233,095

(i) Depreciation methods and useful lives

Property, plant and equipment is recognised at historical cost less depreciation.

Depreciation is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives or, in the case of leasehold improvements and certain leased plant and equipment, the shorter lease term as follows:

•	Plant and equipment	5 - 10 years
•	Furniture, fittings and equipment	2 - 15 years
•	Leasehold improvements	3 years
•	Right-of-use assets	3 years

5 Non-financial assets and liabilities (continued)

(a) Property, plant and equipment (continued)

See note 20(k) for the other accounting policies relevant to property, plant and equipment.

(b) Intangible assets

	2019 \$	2018 \$
Patents, licences and other rights	6,599,755	6,599,755
HER-Vaxx (i)	130,670	130,670
PD-1 (ii)	<u>326,675</u>	326,675
Non PD-1 (ii)	7,057,100	7,057,100

The group's patents, licences and other rights are measured at initial cost, less any accumulated amortisation and impairment losses.

(i) HER-Vaxx

HER-Vaxx intellectual property was acquired through the group's 100 percent acquisition of Biolife Science Qld Pty Ltd on 20 December 2013. In addition, the group holds various worldwide patents granted over the technology.

It is the board's expectation that the acquired HER-Vaxx intellectual property will generate future economic benefits for the group.

(ii) PD-1 and Non PD-1

On 7 June 2018, the group signed an exclusive, worldwide licence to the entire body of cancer vaccine work and intellectual property developed by Professor Pravin Kaumaya of the Ohio State University Wexner Medical Center, the Comprehensive Cancer Center - Arthur G. James Cancer Hospital, the Richard J. Solove Research Institute and Mayo Clinic.

The substantial intellectual property estate licensed comprises a broad patent portfolio including six patent families comprising 16 issued patents or pending applications for compositions of matter and/or methods of use of a large range of B-cell peptide and cancer vaccines comprising PD-1, HER-1, HER-2, HER-3, VEGF, IGF-1R, CD28 peptides and combinations thereof.

It is the board's expectation that the acquired portfolio of intellectual property will generate future economic benefits for the group. The amounts recognised as intangible assets relate to the upfront license fees paid in respect of the licence agreements. The net present value of future maintenance fees, annual licence fees, milestone fees, royalties, and sublicence fees have not been capitalised in accordance with the recognition criteria of AASB 138 *Intangible Assets*. The term of the agreements, including the schedule of future payments is until the last to expire of the patent rights; 2038 for PD-1 patents and 2035 for Non PD-1. Fair values for the future payments (which are contingent on the occurrence of future events and timings over the term of the agreements) cannot be reliably measured in accordance with the standard. Consequently, these future payments are instead accounted for as either contingent liabilities, outlined in note 12, or as commitments, outlined in note 13.

5 Non-financial assets and liabilities (continued)

(b) Intangible assets (continued)

(iii) Impairment tests for patents, licences and other rights

Patents, licences and other rights held by the group are acquired in-process research and development and are considered not yet available for use on the basis that they are incomplete and cannot be used in their current forms. Intangible assets that are not yet available for use are not subject to amortisation and are tested annually for impairment or more frequently if events or changes in circumstances indicate impairment. An impairment analysis is performed annually at the end of the financial year based on fair value less costs of disposal. In-process research and development will continue to be tested for impairment until the related research and development efforts are either completed or abandoned. In the case of abandonment, the related research and development efforts are considered impaired and the asset is fully expensed in the consolidated statement of profit or loss and other comprehensive income.

In determining fair value less costs of disposal, consideration is given to the following indicators:

- The market capitalisation of Imugene Limited on the Australian Securities Exchange on the impairment testing date of 30 June 2019 in excess of the net book value of assets;
- The scientific results and progress of the trials;
- · Comparisons with companies in a similar field of development and similar stage; and
- Overall growth in the oncology sector and \$502 million acquisition of Viralytics Limited by Merck in 2018. Similar to Imugene Limited, Viralytics focuses on the development and commercialisation of oncolytic immunotherapies.

See note 20(I) for the other accounting policies relevant to intangible assets, and note 20(h) for the group's policy regarding impairments.

(iv) Amortisation methods and useful lives

The group has assessed that the HER-Vaxx, PD-1 and Non PD-1 intellectual property is not ready for use as it is not commercialised. Capitalised patents, licences and other rights are amortised from the point at which the asset is ready for use.

On completion of the related research and development efforts, management determines the remaining useful life of the intangible assets and amortises them accordingly. In order for management to determine the remaining useful life of the asset, management would consider the expected flow of future economic benefits to the group with reference to the product life cycle, competitive landscape, obsolescence, market demand, any remaining patent useful life and various other relevant factors.

(c) Employee benefit obligations

	2019 Non-			2018 Non-			
	Current \$	current \$	Total \$	Current \$	current \$	Total \$	
Leave obligations (i)	131,804	11,272	143,076	95,706	15,106	110,812	

(i) Leave obligations

The leave obligations cover the group's liabilities for long service leave and annual leave which are classified as either other long-term benefits or short-term benefits, as explained in note 20(n).

5 Non-financial assets and liabilities (continued)

(c) Employee benefit obligations (continued)

The current portion of this liability includes all of the accrued annual leave, the unconditional entitlements to long service leave where employees have completed the required period of service and also for those employees that are entitled to pro-rata payments in certain circumstances. The entire amount of the provision of \$131,804 (2018: \$95,706) is presented as current, since the group does not have an unconditional right to defer settlement for any of these obligations. However, based on past experience, the group does not expect all employees to take the full amount of accrued leave or require payment within the next 12 months.

(d) Leases

(i) Amounts recognised in the balance sheet

The balance sheet shows the following amounts relating to leases:

	2019	2018
	\$	\$
Right-of-use assets ¹		
Properties	118,942	-
	118,942	-
Lease liabilities ²		
Current	58,590	-
Non-current	64,306	-
	122,896	-

^{1.} Included in the line item 'property, plant and equipment' in the consolidated balance sheet.

² Included in the line items 'other current liabilities' and 'other non-current liabilities' in the consolidated balance sheet.

(ii) Amounts recognised in the statement of profit or loss

The statement of profit or loss shows the following amounts relating to leases:

		2019 \$	2018 \$
Depreciation charge of right-of-use assets Properties		45,447	-
	2(d) 2(c)	6,108 -	-
	2(c)	-	-
	2(c)	-	-

The total cash outflow for leases in 2019 was \$47,251.

5 Non-financial assets and liabilities (continued)

(d) Leases (continued)

(iii) The group's leasing activities and how these are accounted for

The group early adopted AASB 16 *Leases* in the year ended 30 June 2018. At this time, the group did not lease any assets. In September 2018, the group entered into a three-year commercial lease on an office in Sydney's central business district. The lease agreement does not impose any covenants, but the leased asset may not be used as security for borrowing purposes.

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- · fixed payments (including in-substance fixed payments), less any lease incentives receivable
- · variable lease payment that are based on an index or a rate
- · amounts expected to be payable by the lessee under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The lease payments are discounted using the interest rate implicit in the lease, if that rate can be determined, or the group's incremental borrowing rate.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- · any lease payments made at or before the commencement date, less any lease incentives received
- any initial direct costs, and
- restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less.

(ii) Ordinary shares

Ordinary shares entitle the holder to participate in dividends, and to share in the proceeds of winding up the company in proportion to the number of and amounts paid on the shares held.

On a show of hands every holder of ordinary shares present at a meeting in person or by proxy, is entitled to one vote, and upon a poll each share is entitled to one vote.

Ordinary shares have no par value and the company does not have a limited amount of authorised capital.

(iii) Options

Information relating to options, including details of options issued, exercised and lapsed during the financial year and options outstanding at the end of the reporting period, is set out in notes 6(b) and 16.

63,122,493

6 Equity (continued)

(b) Other reserves

The consolidated balance sheet line item 'other reserves' comprises the 'share-based payments reserve'.

(i) Nature and purpose of other reserves

Share-based payments

The share-based payment reserve records items recognised as expenses on valuation of share options issued to key management personnel, other employees and and eligible contractors.

(ii) Movements in options:

(b) Non-cash investing and financing activities

Non-cash investing and financing activities disclosed in other notes are:

• options issued for no cash consideration - note 16.

8 Critical estimates, judgements and errors

The preparation of financial statements requires the use of accounting estimates which, by definition, will seldom equal the actual results. Management also needs to exercise judgement in applying the group's accounting policies.

This note provides an overview of the areas that involved a higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be wrong. Detailed information about each of these estimates and judgements is included in other notes together with information about the basis of calculation for each affected line item in the financial statements.

(a) Significant estimates and judgements

The areas involving significant estimates or judgements are:

- Estimation of R&D tax incentive income accrual note 2(a)(i)
- Estimation of expected future royalties payable note 4(d)(i)
- · Impairment of patents, licences and other rights note 5(b)(iii)
- Estimation of employee benefit obligations note 5(c)(i)
- Estimation of share-based payments note 16(a)(i)

8 Critical estimates, judgements and errors (continued)

(a) Significant estimates and judgements (continued)

Estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances.

9 Financial risk management

This note explains the group's exposure to financial risks and how these risks could affect the group's future financial performance.

The group's risk management is predominantly controlled by the board. The board monitors the group's financial risk management policies and exposures and approves substantial financial transactions. It also reviews the effectiveness of internal controls relating to market risk, credit risk and liquidity risk.

(a) Market risk

(i) Foreign exchange risk

The group undertakes certain transactions denominated in foreign currency and is exposed to foreign currency risk through foreign exchange rate fluctuations.

Foreign exchange rate risk arises from financial assets and financial liabilities denominated in a currency that is not the group's functional currency. Exposure to foreign currency risk may result in the fair value of future cash flows of a financial instrument fluctuating due to the movement in foreign exchange rates of currencies in which the group holds financial instruments which are other than the Australian dollar (AUD) functional currency of the group. This risk is measured using sensitivity analysis and cash flow forecasting. The cost of hedging at this time outweighs any benefits that may be obtained.

Exposure

The group's exposure to foreign currency risk at the end of the reporting period, expressed in Australian dollars, was as follows:

	2019			2018		
	USD \$	EUR \$	USD \$	CHF \$	EUR \$	GBP \$
Cash and cash equivalents	105.499	-	318	-	_	_
Trade payables	1,052,534	8,094	594,907	26,063	25,256	1,605
Total exposure	1,158,033	8,094	595,225	26,063	25,256	1,605

Sensitivity

As shown in the table above, the group is primarily exposed to changes in USD/AUD exchange rates. The sensitivity of profit or loss to changes in the exchange rates arises mainly from USD denominated financial instruments.

The group has conducted a sensitivity analysis of its exposure to foreign currency risk. The group is currently materially exposed to the United States dollar (USD). The sensitivity analysis is conducted on a currency-by-currency basis using the sensitivity analysis variable, which is based on the average annual movement in exchange rates over the past five years at year-end spot rates. The variable for each currency the group is materially exposed to is listed below:

• USD: 6.9% (2018: 6.2%)

9 Financial risk management (continued)

(a) Market risk (continued)

	Impact on los perio		Impact on other omponents of equity		
	2019 \$	2018 \$	2019 \$	2018 \$	
USD/AUD exchange rate - change by 6.9% (2018: 6.2%)	79,904	36,904	-	-	

* Holding all other variables constant

Profit is more sensitive to movements in the AUD/USD exchange rates in 2019 than 2018 because of the increased amount of USD denominated cash and cash equivalents. The group's exposure to other foreign exchange movements is not material.

(ii) Cash flow and fair value interest rate risk

The group's main interest rate risk arises from cash and cash equivalents held, which expose the group to cash flow interest rate risk. During 2019 and 2018, the group's cash and cash equivalents at variable rates were denominated in Australian dollars.

The group's exposure to interest rate risk at the end of the reporting period, expressed in Australian dollars, was as follows:

	2019 \$	2018 \$
Financial instruments with cash flow risk Cash and cash equivalents	19.047.914	7,822,057
Financial assets at amortised cost	50,000	20,306
	19,097,914	7,842,363

Sensitivity

Profit or loss is sensitive to higher/lower interest income from cash and cash equivalents as a result of changes in interest rates.

	Impact on los perio		Impact on other components of equity	
	2019 \$	2018 \$	2019 \$	2018 \$
Interest rates - change by 20 basis points (2018: 21 basis points)*	38,196	16,469	-	-

* Holding all other variables constant

The use of 0.20 percent (2018: 0.21 percent) was determined based on analysis of the Reserve Bank of Australia cash rate change, on an absolute value basis, at 30 June 2019 and the previous four balance dates. The average cash rate at these balance dates was 1.60 percent (2018: 1.85 percent). The average change to the cash rate between balance dates was 12.69 percent (2018: 11.18 percent). By multiplying these two values, the interest rate risk was derived.

Profit is more sensitive to movements in interest rates in 2019 than 2018 due to increased cash and cash equivalents. The group's exposure to other classes of financial instruments with cash flow risk is not material.

9 Financial risk management (continued)

(b) Credit risk

Exposure to credit risk relating to financial assets arises from the potential non-performance by counterparties of contract obligations that could lead to a financial loss to the group.

There has been an increase in the group's exposure to credit risk in 2019 due to increased cash and cash equivalents. The group's exposure to other classes of financial assets with credit risk is not material.

(i) Risk management

Risk is minimised through investing surplus funds in financial institutions that maintain a high credit rating.

(ii) Impairment of financial assets

While cash and cash equivalents and deposits at call are subject to the impairment requirements of AASB 9, the identified impairment loss was immaterial.

(c) Liquidity risk

Liquidity risk arises from the possibility that the group might encounter difficulty in settling its debts or otherwise meeting its obligations related to financial liabilities. The group manages this risk through the following mechanisms:

- preparing forward looking cash flow analyses in relation to its operating, investing and financing activities;
- obtaining funding from a variety of sources;
- maintaining a reputable credit profile;
- managing credit risk related to financial assets;
- investing cash and cash equivalents and deposits at call with major financial institutions; and
- comparing the maturity profile of financial liabilities with the realisation profile of financial assets.

(i) Maturities of financial liabilities

The tables below analyse the group's financial liabilities into relevant maturity groupings based on their contractual maturities. The amounts disclosed in the table are the contractual undiscounted cash flows.

Contractual maturities of financial liabilities	Less than 6 months	6 - 12 months	Between 1 and 2 years	Between 2 and 5 years	Total Carrying contractual amount Over 5 cash (assets)/ years flows liabilities
At 30 June 2019	\$	\$	\$	\$	\$ \$ \$
Trade and other payables	2,233,212	-	-	-	- 2,233,212 2,233,212
Lease liabilities	29,106	29,484	60,934	10,221	- 129,745 129,745
Other financial liabilities	-	-	-	985,450	- 985,450 985,450
Total	2,262,318	29,484	60,934	995,671	- 3,348,407 3,348,407

At 30 June 2018

Trade and other payables	342,534	-	-	-	-	342,534	342,534
Other financial liabilities	-	-	- 9	985,450	-	985,450	985,450
Total	342,534	-	- 9	85,450	- 1	1,327,984	1,327,984

10 Capital management

(a) Risk management

The group's objectives when managing capital are to

- safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders, and
- maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the group may issue new shares or reduce its capital, subject to the provisions of the group's constitution. The capital structure of the group consists of equity attributed to equity holders of the group, comprising contributed equity, reserves and accumulated losses. By monitoring undiscounted cash flow forecasts and actual cash flows provided to the board by the group's management, the board monitors the need to raise additional equity from the equity markets.

(b) Dividends

No dividends were declared or paid to members for the year ended 30 June 2019 (2018: nil). The group's franking account balance was nil at 30 June 2019 (2018: nil).

11 Interests in other entities

(a) Material subsidiaries

The group's principal subsidiaries at 30 June 2019 are set out below. Unless otherwise stated, they have share capital consisting solely of ordinary shares that are held directly by the group, and the proportion of ownership interests held equals the voting rights held by the group. The country of incorporation or registration is also their principal place of business.

Name of entity	Place of business/ country of incorporation	Ownership interest held by the group		
		2019 %	2018	
Biolife Science Qld Pty Ltd	Australia	100	100	

12 Contingent liabilities

(a) PD-1 and Non PD-1 intellectual property

The group signed an exclusive licence with the Ohio State University and Mayo Clinic on 6 June 2018 to 16 issued patents or pending applications comprising PD-1 and Non PD-1 intellectual property. As a result, the group has incurred liabilities contingent on future events in respect of each agreement (i.e. the separate PD-1 and Non PD-1 agreements):

- Royalties on sales: 3 percent of sales where annual turnover is less than US\$1 billion; 4 percent where annual turnover is greater than US\$1 billion
- **Milestone fees**: Up to US\$250,000 payable upon dosing of the first patient in each phase of a clinical trial; US\$1,000,000 payable upon first commercial sale
- Annual licence fees: US\$250,000 per annum payable contingent on first commercial sale
- Sublicence fees:
 - 25 percent of sublicensing consideration prior to first patient dosing in Phase I clinical trial
 - 15 percent of sublicensing consideration prior to first patient dosing in Phase II clinical trial

12 Contingent liabilities (continued)

(a) PD-1 and Non PD-1 intellectual property (continued)

- 10 percent of sublicensing consideration prior to first patient dosing in Phase III clinical trial
- 8 percent of sublicensing consideration after first patient dosing in Phase III clinical trial

13 Commitments

(a) Research and development commitments

The group had research and development commitments at 30 June 2019 in respect of:

(i) Arginine modulator intellectual property

On 13 December 2016, the group announced it had entered into an agreement with Baker IDI Heart and Diabetes Institute Holdings Limited where a contingent liability exists relating to the commercialisation of arginine modulator intellectual property. As at 30 June 2019, no liability was recognised on the basis that commercialised income cannot be reliably measured.

(ii) PD-1 and Non PD-1 intellectual property

The group signed an exclusive licence with the Ohio State University and Mayo Clinic on 6 June 2018 to 16 issued patents or pending applications comprising PD-1 and Non PD-1 intellectual property. As a result, the group has incurred the following commitments in respect of each agreement (i.e. the separate PD-1 and Non PD-1 agreements):

 Maintenance fees: Up to US\$100,000 payable annually each anniversary of the agreement, until the date of first commercial sale.

In a third agreement, separate to the PD-1 and Non PD-1 licensing agreements, the group has a commitment to pay US\$546,000 per annum to cover ongoing research costs by the Ohio State University for the financial years ending 30 June 2020 and 2021. These payments are for work yet to be performed as at 30 June 2019.

14 Events occurring after the reporting period

On 15 July 2019, the group announced that it would acquire Vaxinia Pty Ltd and separately acquire a worldwide exclusive licence to an oncolytic virus technology. Known as CF33, this technology was developed by Professor Yuman Fong at City of Hope, an independent research and treatment centre for cancer, diabetes and other life-threatening diseases based in Los Angeles, California.

Under the terms of the licence agreement, the group acquires the exclusive worldwide rights to develop and commercialise the CF33 oncolytic virus. The group has agreed to pay City of Hope licence fees comprising upfront and annual maintenance fees which are creditable against future royalty payments, performance-based consideration linked to the achievement of certain value-inflection development milestones and commercial outcomes, as well as net sales-based royalty payments and sublicensing fees.

As part of the overall transaction, the group has entered into a binding agreement to acquire 100% of the share capital in Vaxinia Pty Ltd, whose major shareholder is Paul Hopper, Executive Chairman of the group. Completion of the acquisition is subject to a number of customary conditions precedent and shareholder approval. The transaction, includes an up-front cash payment and the issue of ordinary fully paid Imugene Limited ordinary shares valued at \$1.619 million based on the seven-day VWAP prior to 15 July 2019.

The shareholders of Vaxinia Pty Ltd will also be eligible for further payments in equity on the achievement of performance-related milestones as disclosed in the 15 July 2019 announcement.

The accounting for this transaction is still in the process of being finalised at the time of issuing this report.

14 Events occurring after the reporting period (continued)

No other matter or circumstance has occurred subsequent to period end that has significantly affected, or may significantly affect, the operations of the group, the results of those operations or the state of affairs of the group or economic entity in subsequent financial years.

15 Related party transactions

(a) Subsidiaries

Interests in subsidiaries are set out in note 11.

(b) Key management personnel compensation

	2019 \$	2018 \$
Short-term employee benefits	1,546,858	823,133
Post-employment benefits Long-term benefits	50,706 13,918	41,528 15,081
Share-based payments	725,942	19,847
	2,337,424	899,589

Notes

 Movement in annual leave obligations (included within short-term employee benefits) was not included in the annual report for the year ended 30 June 2018. This has been retrospectively included for consistency with the 30 June 2019 key management personnel compensation.

Detailed remuneration disclosures are provided in the remuneration report on pages 19 to 26.

(c) Transactions with other related parties

As disclosed in note 14, the group has announced the proposed acquisition of Vaxinia Pty Ltd, subject to both regulatory and shareholder approval. The group has entered into a binding agreement to acquire 100% of the share capital held in Vaxinia Pty Ltd, whose major shareholder is Mr Paul Hopper, Executive Chairman of the group.

16 Share-based payments

(a) Employee share and option plan

The establishment of the 'employee share option plan' (ESOP) was approved by shareholders at the 2016 annual general meeting. The plan is designed to provide long-term incentives for employees (including directors) to deliver long-term shareholder returns. Participation in the plan is at the board's discretion and no individual has a contractual right to participate in the plan or to receive any guaranteed benefits.

16 Share-based payments (continued)

(a) Employee share and option plan (continued)

Set out below are summaries of all listed and unlisted options, including those issued under ESOP:

	2019		201	8
	Average exercise price		Average exercise price	
	per share option	Number of options	per share option	Number of options
As at 1 July	\$0.02	306,959,162	\$0.02	59,000,000
Granted during the year	\$0.04	473,319,823	\$0.03	252,534,374
Exercised during the year	\$0.02	(10,004,745)	-	-
Forfeited/lapsed during the year	\$0.02	(10,000,000)	\$0.01	(4,575,212)
As at 30 June	\$0.03	760,274,240	\$0.02	306,959,162
Vested and exercisable at 30 June	\$0.03	561,524,240	\$0.02	282,959,162

Share options outstanding at the end of the year have the following expiry date and exercise prices:

16 Share-based payments (continued)

(a) Employee share and option plan (continued)

(i) Fair value of options granted

The assessed fair value of options at grant date was determined using the Black-Scholes option pricing model that takes into account the exercise price, term of the option, security price at grant date and expected price volatility of the underlying security, the expected dividend yield, the risk-free interest rate for the term of the security and certain probability assumptions.

The model inputs for options granted under ESOP during the year ended 30 June 2019 included:

Grant date	Expiry date	Exercise price (\$)	No. of options	Share price at grant date (\$)	Expected volatility	Dividend yield	Risk- free interest rate	Fair value at grant date per option (\$)
2018-07-19 (IMUOP14)	2021-06-30	0.04	5,000,000	0.022	105.00%	0.00%	2.14%	0.0117

(b) Expenses arising from share-based payment transactions

Total expenses arising from share-based payment transactions recognised during the period were as follows:

	2019 \$	2018 \$
Options issued under ESOP	774,471	84,415

17 Remuneration of auditors

During the year the following fees were paid or payable for services provided by the auditor of the parent entity, its related practices and non-related audit firms:

(a) Grant Thornton Audit Pty Ltd

(i) Audit and other assurance services

	2019 \$	2018 \$
Audit and review of financial statements	52,000	55,000
Total remuneration for audit and other assurance services	52,000	55,000
Total auditor's remuneration	52,000	55,000
18 Loss per share		
(a) Reconciliation of loss used in calculating loss per share		
	2019 \$	2018 \$
<i>Basic and diluted loss per share</i> Loss attributable to the ordinary equity holders of the company used in calculating loss per share:		
From continuing operations	7,775,360	3,933,641
(b) Weighted average number of shares used as the denominator		
	2019 Number	2018 Number
Weighted average number of ordinary shares used as the denominator in calculating basic and diluted loss per share	<u>3,581,918,719</u>	2,637,869,758

On the basis of the group's losses, the outstanding options as at 30 June 2019 are considered to be anti-dilutive and therefore were excluded from the diluted weighted average number of ordinary shares calculation.

19 Parent entity financial information

(a) Summary financial information

The individual financial statements for the parent entity show the following aggregate amounts:

	2019	2018
	\$	\$
Balance sheet Current assets Non-current assets Total assets Current liabilities Non-current liabilities	23,423,568 5,256,033 28,679,601 2,423,608 75,578	9,817,915 5,087,663 14,905,578 438,242 15,106
Total liabilities	2,499,186	453,348
Shareholders' equity Share capital Reserves Share-based payments Accumulated losses	63,122,493 988,945 (37,931,023)	44,285,931 299,945 (30,133,646)
	26,180,415	14,452,230
Loss for the period	7,760,311	2,312,909
Total comprehensive loss	7,760,311	2,312,909

(b) Guarantees entered into by the parent entity

The parent entity has not entered into any guarantees in relation to debts of its subsidiaries in the year ended 30 June 2019 (2018: nil).

(c) Contingent liabilities of the parent entity

The parent entity had contingent liabilities at 30 June 2019 identical to those of the group, as outlined in note 12.

(d) Contractual commitments for the acquisition of property, plant or equipment

The parent entity has not entered into any contractual commitments for the acquisition of property, plant or equipment in the year ended 30 June 2019 (2018: nil).

(e) Determining the parent entity financial information

The financial information for the parent entity has been prepared on the same basis as the consolidated financial statements, except as set out below.

(i) Investments in subsidiaries

Investments in subsidiaries are accounted for at cost in the financial statements of Imugene Limited.

19 Parent entity financial information (continued)

(e) Determining the parent entity financial information (continued)

(ii) Tax consolidation legislation

Imugene Limited and its wholly-owned Australian controlled entities have implemented the tax consolidation legislation.

The head entity, Imugene Limited, and the controlled entities in the tax consolidated group account for their own current and deferred tax amounts. These tax amounts are measured as if each entity in the tax consolidated group continues to be a stand-alone taxpayer in its own right.

In addition to its own current and deferred tax amounts, Imugene Limited also recognises the current tax liabilities (or assets) and the deferred tax assets arising from unused tax losses and unused tax credits assumed from controlled entities in the tax consolidated group.

The entities have also entered into a tax funding agreement under which the wholly-owned entities fully compensate Imugene Limited for any current tax payable assumed and are compensated by Imugene Limited for any current tax receivable and deferred tax assets relating to unused tax losses or unused tax credits that are transferred to Imugene Limited under the tax consolidation legislation. The funding amounts are determined by reference to the amounts recognised in the wholly-owned entities' financial statements.

The amounts receivable/payable under the tax funding agreement are due upon receipt of the funding advice from the head entity, which is issued as soon as practicable after the end of each financial year. The head entity may also require payment of interim funding amounts to assist with its obligations to pay tax instalments.

Assets or liabilities arising under tax funding agreements with the tax consolidated entities are recognised as current amounts receivable from or payable to other entities in the group.

Any difference between the amounts assumed and amounts receivable or payable under the tax funding agreement are recognised as a contribution to (or distribution from) wholly-owned tax consolidated entities.

20 Summary of significant accounting policies

This note provides a list of the significant accounting policies adopted in the preparation of these consolidated financial statements to the extent they have not already been disclosed in the other notes above. These policies have been consistently applied to all the years presented, unless otherwise stated. The financial statements are for the group consisting of Imugene Limited and its subsidiaries.

(a) Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board and the *Corporations Act 2001*. Imugene Limited is a for-profit entity for the purpose of preparing the financial statements.

(i) Compliance with IFRS

The consolidated financial statements of the Imugene Limited group also comply with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

(ii) Historical cost convention

The financial statements have been prepared on a historical cost basis.

(iii) Going concern

Some of the risks inherent in the development of oncolytic immunotherapies include the uncertainty of patent protection and proprietary rights, whether patent applications and issued patents will offer adequate protection to enable product development or may infringe intellectual property rights of other parties, and obtaining the necessary drug clinical regulatory authority approvals. Furthermore, a particular project may fail the research and the clinical development process through lack of efficacy or safety, or may be stopped or abandoned due to strategic imperatives including an assessment that the projects will not deliver a sufficient return on investment or have been superseded by newer competitive products or technologies. There is a risk that the group will be unable to find suitable development or commercial partners for its projects, and that these arrangements may not generate a material return for the group.

Based on current budget forecast assumptions, the group is in a position to meet future commitments in the current business cycle and pay its debts as and when they fall due. Furthermore, the group is able to progress its research and development programs for at least the next 12 months.

The annual report has been prepared on a going concern basis. Accordingly, the annual report does not include adjustments relating to the recoverability and classification of recorded asset amounts, or the amounts and classification of liabilities that might be necessary should the group not continue as a going concern.

(iv) New and amended standards adopted by the group

There are no new accounting standards or interpretations that would be expected to have a material impact on the group in the current or future reporting periods and on foreseeable future transactions.

AASB 9 Financial Instruments, AASB 15 Revenue from Contracts with Customers and AASB 16 Leases were early adopted by the group in the year ended 30 June 2018.

(v) New standards and interpretations not yet adopted

There are no new standards and interpretations that are not yet effective and that would be expected to have a material impact on the group in the current or future reporting periods and on foreseeable future transactions.

20 Summary of significant accounting policies (continued)

(a) Basis of preparation (continued)

(vi) Changes to presentation – classification of expenses

Imugene Limited decided in the current financial year to change the classification of its expenses in the consolidated statement of profit or loss. We believe that this will provide more relevant information to our stakeholders as it is more in line with common practice in the industries Imugene Limited is operating in. The comparative information has been reclassified accordingly.

(vii) Changes to presentation - classification of cash flows

Imugene Limited decided in the current financial year to change the classification of interest received and interest paid in the consolidated statement of cash flows from operating to investing and financing activities, respectively. The comparative information has been reclassified accordingly.

(b) Principles of consolidation

(i) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

The acquisition method of accounting is used to account for business combinations by the group.

Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

(c) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. This has been identified as the chief executive officer.

(d) Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the group's entities are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The consolidated financial statements are presented in Australian dollar (\$), which is Imugene Limited's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in profit or loss.

Foreign exchange gains and losses that relate to borrowings are presented in the consolidated statement of profit or loss, within finance costs. All other foreign exchange gains and losses are presented in the consolidated statement of profit or loss on a net basis within other gains/(losses).

20 Summary of significant accounting policies (continued)

(e) Government grants

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the group will comply with all attached conditions. Note 2 provides further information on how the group accounts for government grants.

(f) Income tax

The income tax expense or credit for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the company and its subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

(g) Leases

The accounting policies for the group's leases are explained in note 5(d)(iii).

(h) Impairment of assets

Intangible assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

20 Summary of significant accounting policies (continued)

(i) Cash and cash equivalents

For the purpose of presentation in the consolidated statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities in the consolidated balance sheet.

(j) Investments and other financial assets

(i) Classification

The group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss), and
- those to be measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

(ii) Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the group has transferred substantially all the risks and rewards of ownership.

(iii) Measurement

At initial recognition, the group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Debt instruments

Subsequent measurement of debt instruments depends on the group's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the group classifies its debt instruments:

 Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the consolidated statement of profit or loss.

20 Summary of significant accounting policies (continued)

(j) Investments and other financial assets (continued)

- FVOCI: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the
 assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in
 the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest
 income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is
 derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss
 and recognised in other gains/(losses). Interest income from these financial assets is included in finance income
 using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses)
 and impairment expenses are presented as separate line item in the consolidated statement of profit or loss.
- FVPL: Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on
 a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within
 other gains/(losses) in the period in which it arises.

(iv) Impairment

The group assesses on a forward looking basis the expected credit losses associated with its debt instruments carried at amortised cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

(v) Income recognition

Interest income

Interest income is recognised using the effective interest method. When a receivable is impaired, the group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate.

(k) Property, plant and equipment

Property, plant and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the group and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

The depreciation methods and periods used by the group are disclosed in note 5(a).

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (note 20(h)).

Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in profit or loss.

20 Summary of significant accounting policies (continued)

(I) Intangible assets

Intangible assets are initially measured at cost. Following initial recognition, intangible assets are carried at historical cost, less any accumulated amortisation and impairment losses. The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised over the useful life and assessed for impairment whenever there is an indication of impairment. Amortisation methods and periods for an intangible asset with a finite useful life is reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation method and/or period, as appropriate, which is a change in accounting estimate. The amortisation expense on intangible assets with finite lives is recognised in the consolidated statement of profit or loss and other comprehensive income.

(i) Patents, licences and other rights

The accounting policies for the group's patents, licences and other rights are explained in note 5(b).

(ii) Research and development

Expenditure on research activities, undertaken with the prospect of obtaining new scientific or technical knowledge and understanding, is recognised in the consolidated statement of profit or loss and other comprehensive income as an expense when it is incurred.

Expenditure on development activities, being the application of research findings or other knowledge to a plan or design for the production of new or substantially improved products or services before the start of commercial production or use, is capitalised if it is probable that the product or service is technically and commercially feasible, will generate probable economic benefits, adequate resources are available to complete development and cost can be measured reliably. Other development expenditure is recognised in the consolidated statement of profit or loss and other comprehensive income as an expense as incurred.

(iii) Amortisation methods and periods

Refer to note 5(b)(iv) for details about amortisation methods and periods used by the group for intangible assets.

(m) Trade and other payables

These amounts represent liabilities for goods and services provided to the group prior to the end of financial year which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition. Trade and other payables are presented as current liabilities unless payment is not due within 12 months after the reporting period. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

(n) Employee benefits

(i) Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulating sick leave that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

20 Summary of significant accounting policies (continued)

(n) Employee benefits (continued)

(ii) Other long-term employee benefit obligations

The group also has liabilities for long service leave and annual leave that are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. These obligations are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the end of the reporting period of high-quality corporate bonds with terms and currencies that match, as closely as possible, the estimated future cash outflows. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in profit or loss.

The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

(iii) Share-based payments

Share-based compensation benefits are provided to employees via the 'employee share option plan' (ESOP). Information relating to these schemes is set out in note 16.

Employee options

The fair value of options granted under the ESOP is recognised as a share-based payment expense with a corresponding increase in equity. The total amount to be expensed is determined by reference to the fair value of the options granted:

- including any market performance conditions (e.g. the company's share price)
- excluding the impact of any service and non-market performance vesting conditions (e.g. profitability, sales growth targets and remaining an employee of the company over a specified time period), and
- including the impact of any non-vesting conditions (e.g. the requirement for employees to save or holdings shares for a specific period of time).

The total expense is recognised over the vesting period, which is the period over which all of the specified vesting conditions are to be satisfied. At the end of each period, the entity revises its estimates of the number of options that are expected to vest based on the non-market vesting and service conditions. It recognises the impact of the revision to original estimates, if any, in profit or loss, with a corresponding adjustment to equity.

(o) Contributed equity

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

(p) Loss per share

(i) Basic loss per share

Basic loss per share is calculated by dividing:

- the loss attributable to owners of the company, excluding any costs of servicing equity other than ordinary shares
- by the weighted average number of ordinary shares outstanding during the financial year, adjusted for bonus elements in ordinary shares issued during the year.

20 Summary of significant accounting policies (continued)

(p) Loss per share (continued)

(ii) Diluted loss per share

Diluted loss per share adjusts the figures used in the determination of basic loss per share to take into account:

- the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares, and
- the weighted average number of additional ordinary shares that would have been outstanding assuming the conversion of all dilutive potential ordinary shares.

(q) Rounding of amounts

The company is of a kind referred to in ASIC Legislative Instrument 2016/191, relating to the 'rounding off' of amounts in the financial statements. Amounts in the financial statements have been rounded off in accordance with the instrument to the nearest dollar.

(r) Goods and services tax (GST)

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the taxation authority. In this case it is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the taxation authority is included with other receivables or payables in the consolidated balance sheet.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the taxation authority, are presented as operating cash flows.

Imugene Limited Directors' declaration 30 June 2019

In the directors' opinion:

- (a) the financial statements and notes set out on pages 33 to 73 are in accordance with the *Corporations Act* 2001, including:
 - (i) complying with Accounting Standards, the *Corporations Regulations 2001* and other mandatory professional reporting requirements, and
 - (ii) giving a true and fair view of the consolidated entity's financial position as at 30 June 2019 and of its performance for the financial year ended on that date, and
- (b) there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.

Note 20(a) confirms that the financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board.

The directors have been given the declarations by the chief executive officer and chief financial officer required by section 295A of the *Corporations Act 2001*.

This declaration is made in accordance with a resolution of directors.

IA.

Mr Paul Hopper Executive Chairman
